Statement Regarding Assumptions as to Securities, pricing estimates, and other Information

The information contained in the attached materials (the "Information") may include various forms of performance analysis, security characteristics and securities pricing estimates for the securities addressed. Please read and understand this entire statement before utilizing the Information. The Information is provided solely by Bear Stearns, not as agent for any issuer, and although it may be based on data supplied to it by an issuer, the issuer has not participated in its preparation. The Information does not include all material information about the securities or the mortgage pool. Should you receive Information that refers to the "Statement Regarding Assumptions and Other Information," please refer to this statement instead.

The Information is illustrative and is not intended to predict actual results which may differ substantially from those reflected in the Information. Performance analysis is based on certain assumptions with respect to significant factors that may prove not to be as assumed. You should understand the assumptions and evaluate whether they are appropriate for your purposes. Performance results are based on mathematical models that use inputs to calculate results. As with all models, results may vary significantly depending upon the value of the inputs given. Inputs to these models include but are not limited to: prepayment expectations (economic prepayment models, single expected lifetime prepayments or a vector of periodic prepayments), interest rate assumptions (parallel and nonparallel changes for different maturity instruments), collateral assumptions (actual pool level data, aggregated pool level data, reported factors or imputed factors), volatility assumptions (historically observed or implied current) and reported information (paydown factors, rate resets, and trustee statements). Models used in any analysis may be proprietary making the results difficult for any third party to reproduce. Contact your registered representative for detailed explanations of any modeling techniques employed in the Information.

The Information addresses only certain aspects of the applicable security's characteristics and thus does not provide a complete assessment. As such, the Information may not reflect the impact of all structural characteristics of the security, including call events and cash flow priorities at all prepayment speeds and/or interest rates. You should consider whether the behavior of these securities should be tested as assumptions different from those included in the Information. The assumptions underlying the Information, including structure and collateral, may be modified from time to time to reflect changed circumstances. Any information herein regarding the collateral or the securities will be supplemented by information regarding the collateral and/or the securities contained in the prospectus and the prospectus supplement (Offering Documents) and any subsequent information regarding the collateral or the securities. Offering Documents contain data that is current as of their publication dates and after publication may no longer be complete or current and any subsequent information regarding the collateral or the securities. Contact your registered representative for Offering Documents, current Information or additional materials, including other models for performance analysis, which are likely to produce different results, and any further explanation regarding the Information.

Any pricing estimates Bear Stearns has supplied at your request (a) represent our view, at the time determined, of the investment value of the securities between the estimated bid and offer levels, the spread between which may be significant due to market volatility or illiquidity, (b) do not constitute a bid by any person for any security, (c) may not constitute prices at which the securities could have been purchased or sold in any market, (d) have not been confirmed by actual trades, may vary from the value Bear Stearns assigns any such security while in its inventory, and may not take into account the size of a position you have in the security, and (e) may have been derived from matrix pricing that uses data relating to other securities whose prices are more readily ascertainable to produce a hypothetical price based on the estimated yield spread relationship between the securities.

General Information: The data underlying the Information has been obtained from sources that we believe are reliable, but we do not guarantee the accuracy of the underlying data or computations based thereon. Bear Stearns and/or individuals employed thereby may have positions in these securities while the Information is circulating or during such period may engage in transactions with the issuer or its affiliates. We act as principal in transactions with you, and accordingly, you must determine the appropriateness for you of such transactions and address any legal, tax, or accounting considerations applicable to you. Bear Stearns shall not be a fiduciary or advisor unless we have agreed in writing to receive compensation specifically to act in such capacities. If you are subject to ERISA, the Information is being furnished on the condition that it will not form a primary basis for any investment decision.

BEAR STEARNS

The information contained herein will be supplemented by the description of the collateral contained in the prospectus supplement.

**The Negotiated Conduit
Asset Program:**

The mortgage loans included in the trust were acquired and evaluated under Residential Funding's "Negotiated Conduit Asset Program" or NCA program. Through the NCA program, Residential Funding seeks to acquire recently originated mortgage loan products with the characteristics described in the attached collateral tables. The mortgage loans may include a combination of layered risk factors including, but not limited to, credit score, reduced loan documentation, debt-to-income ratio, and loan to value ratio.

Residential Funding's standard programs are identified as follows:

- Jumbo A program, under which Residential Funding purchases "A" quality, non-conforming mortgage loans, which are then securitized under the RFMSI shelf. An example of an NCA program loan includes, but is not limited to, a mortgage loan made to a borrower with a higher total debt-to-income ratio than that allowed by Residential Funding's "Jumbo A" program.
- Expanded Criteria program, under which Residential Funding purchases mortgage loans to "A" quality borrowers whose collateral characteristics differ from conforming and jumbo guidelines, which are then securitized under the RALI shelf. An example of an NCA program loan includes, but is not limited to, a mortgage loan where the combination of loan-to-value ratio, credit score and documentation type do not meet Residential Funding's "Expanded Criteria" program guidelines.
- Home Solution program, under which Residential Funding purchases first lien "A" quality mortgage loans with LTVs up to 107% and for which the related borrowers may have limited cash, may not want to take cash out of their investments, or may want to finance the full value of the home plus closing costs, which are then securitized under the RAMP-RZ shelf. An example of an NCA program loan includes, but is not limited to, a loan made to a borrower who does not meet reserve requirements of the program or whose total debt-to-income exceeds underwriting guidelines of Residential Funding's "Home Solution" program.
- AlterNet program, under which Residential Funding purchases mortgage loans with characteristics that do not meet traditional "A" quality credit requirements, which are then securitized under the RASC shelf. An example of an NCA program loan includes, but is not limited to, a mortgage loan with a higher loan-to-value ratio than the credit grade within Residential Funding's "AlterNet" program guidelines allow.

Swap Agreement:

On the Closing Date, the Trustee will enter into a Swap Agreement with [] (the "Swap Counterparty") for the benefit of the Class A-I, Class M and Class B Certificates. The Swap Agreement will have an initial notional amount of approximately \$[573,976,891]. Under the Swap Agreement, (i) the trust shall be obligated to pay to the Swap Counterparty an amount equal to [4.122]% per annum on the lesser of (a) the swap notional amount set forth below and (b) the aggregate principal balance of the Class A-I, Class M, and Class B Certificates (the "Notional Balance") and (ii) the trust will be entitled to receive an amount equal to One-Month LIBOR on the swap notional amount set forth below or the Notional Balance from the Swap Counterparty, on each Distribution Date, accrued during the swap accrual period (26 days in the case of the first accrual period), until the swap is retired. Only the net amount of the two obligations above will be paid by the appropriate party. Upon early termination of the Swap Agreement, the trust or the Swap Counterparty may be liable to make a termination payment (the "Swap Termination Payment") to the other party, regardless of which party caused the termination. The Swap Termination Payment will be computed in accordance with the procedures set forth in the Swap Agreement. In the event that the trust is required to make a Swap Termination Payment, that payment will be paid on the related Distribution Date, and on any subsequent Distribution Dates until paid in full, prior to distributions to Certificateholders (other than a Swap Termination Payment due to a Swap Provider Trigger Event). Shown below is the aggregate swap notional amount schedule, which generally has been derived by adding (A) for the fixed rate collateral, a notional balance corresponding to 1.5x the pricing speed and (B) for the adjustable rate collateral (1) during the respective fixed rate period, a notional balance corresponding to 40% CPR and (2) during the respective adjustable rate period, zero minus (C) the Overcollateralization Target.
